

FOR A PEACEFUL HOLIDAY WE COMMIT OURSELVES

At the campsite, Hugo, Alex, Romane and Maëlle will be trained in the application and explanation of sanitary rules: distance measures, disinfection, use of masks in covered areas, direction of circulation in common areas. But also to recognize the symptoms of a possibly infected person and to have the appropriate reactions to this situation, we have chosen to condemn a lodging in order to keep symptomatic people away.

The sanitary blocks being usually cleaned twice a day, will also be disinfected regularly.

We have set up a "pedestrian" direction of traffic so that people will be led to cross each other as little as possible.

Hydro-alcoholic gel terminals will be installed in all the meeting places (playground, sanitary facilities, reception, bar...).

In the rentals, exceptionally this year, blankets, pillows and duvets will not be provided. After each departure, the rentals will be completely aired and will be cleaned in depth with steam at + 120° and in order to perfect the disinfection they will be cleaned with disinfectant products authorized EN 14476.

Each rental unit will have a bottle of hydro-alcoholic gel at its disposal.

Concerning the snack/bar, we will apply the distance in force by privileging our external installations with a service which will not be done any more at the bar, the snacking will be delivered directly to you etc...

As far as the animations are concerned, the year 2020 will be a little different, this allows us to re-invent ourselves. We will propose children's activities in small groups, original activities respecting the distance. We will also offer geo caching with the family. Evening concerts will still be part of the party and why not touring concerts... (we are thinking about it).

Outside visitors will not be allowed.

The swimming pool will be open, with fewer deckchairs and a limited number of people in the pool area.

We'll do our utmost to ensure that your holiday will be one of relaxation and conviviality.

Laurence & Franch
